

Choosing An Online Casino (And Easy Online Casino Exploits)

With All the wonderful things the World Wide Web has brought to our lives, it has also made us vulnerable to many frauds and cons on money related Issues.

In this world, it is hard to know who you can trust, and that's why I've put together this article that explains all about the Online Casino Industry, and where it's best to put down your money.

The Online Casinos can be much more profitable for you than regular Casinos due to the fact that their low maintenance allows them to offer high bonuses and games with great odds (such as European roulette, where as in Vegas you would probably come upon an American roulette where the house edge is extremely higher (4 times higher to be precise). The problem is that some dubious Online Casinos use the fact that they can control the Randomness of a roulette spin, card draw, dice throw and so on. For instance, if the Online Casino's program decided to add another '5' card to a 4 deck game, you would never even know of it, but it will give the house an extreme edge over the gambler and defiantly bankrupt him. For this reason it is very important to choose an Online Casino that has been running for many years, has known brand gaming software, and a high payout rate.

When you put down your money in a Casino, it's important to know it's a fair Casino, but in addition there are other things you need to take in consideration:

- **Signup Bonuses** – The Online Casinos are willing to go a long way to attract new visitors:

Some sites will actually give you 100% of what you deposit. So if you deposit 100\$, you get 100\$ FREE! You have to Wager 2000\$ and playing Basic Blackjack Strategy for instance, you will probably lose about $2000\$ \times 0.5\% = 10\$$ loss. You profit 90\$!

Some players actually use this method to make lots of money. They don't even know card counting! They sign up, get the Bonus, play the minimum wage playing basic blackjack strategy (very simple), lose a bit of the bonus but still have nice profits. Then they simply withdraw their money, move on to the next casino and pull off the same trick. This is done pretty simply, and if you want to know exactly how, just [download and read this FREE eBook](#).

- **The gaming odds** – there are hundreds of variations to every game, and choosing the right place to gamble is very crucial. I will use the roulette example again, to emphasize the importance of choosing the right Casino with the right odds.

I once came across a very "Sexy" Online Casino offering high Bonuses, many games, and even with good software. The problem was that the games had insane rule variations (American roulette, no '2:1 payoff for Blackjack' and other annoying rules in Blackjack). This way even if you 'gambled smart', you were more likely to lose all your money before you got to the minimum wage at which you can cash out your bonus (at all Casinos the deposited money can be cashed out any time and the bonus is dependent upon a minimum wage total). I won't mention the name of this Casino because it was closed due to many gamblers complaints.

For this reason, the odds may be the most important thing when choosing your Online Casino.

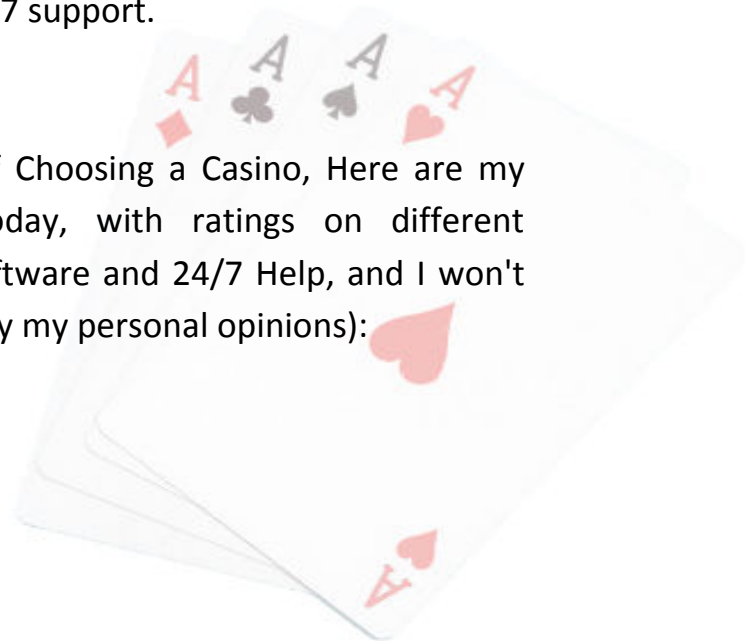

- **Payout Rates (Percentage)** - The casino payout rate is a percentage that most self respecting Online Casinos publish, and it indicates what proportion of the total money bet by players is being paid out as winnings. ie: If the payout percentage is 97.4%, then 97.4% of all the money bet at the casino is paid out to winners, and the casino gets to keep 2.6% of the total bets. Some will even publish the percentages at the different games (a different one for Blackjack, Roulette and so on). Obviously, this Percentage is defined mainly by the game odds (But there are other factors too. For instance, "High

Roller" Casinos have better payout rates because they attract more experienced gamblers).

- **Gaming Software** - The leading Online Gaming Software suppliers are Microgaming, Playtech and Cryptologic. Their Software, usually available as free downloads, drives the majority of highly regarded online casinos. The Software for games such as slots, poker, roulette and blackjack integrates Random Number Generators (RNGs) that randomize the outcome by using complex mathematical algorithms. This Insures 100% Randomness. You should stick with Casinos Using these programs.
- **Appealing** – This is also important, we don't only gamble For Money, but also for the fun of it. Different people have different preferences. For instance I can't stand Online Casinos with too many Blue colors; they give me bad luck :) On the other hand I love the green ones...
- **24/7 Online and Phone Help** – Casinos that respect themselves and their clients, all have 24/7 support.

Ok, now that we know the Basics of Choosing a Casino, Here are my favorite leading Online Casinos today, with ratings on different parameters (all have Name Brand Software and 24/7 Help, and I won't rate 'Appealing' because those are only my personal opinions):

*Payout Rates are for December 2006

Casino-On-Net (888):

This is my personal favorite.

Launched in 1996, this is one of the oldest and most visited Online-Casinos worldwide and has Won tons of awards.

SignUp bonuses (**100% up to 200\$**) ★★★★★

Payout rate (**98.6%**) ★★★★★

Rule set (**games with best odds!**) ★★★★★

OverAll: ★★★★★

Comment: The [888 Online Blackjack Course](#) is extremely recommended.

[Click here to download 888 Casino](#)

Casino-Tropez:

Casino Tropez is one of today's leading online casinos. Known For their extremely fast payouts.

SignUp bonuses (**100% up to 300\$**) ★★★★★

Payout rate (**97% +**) ★★★★★

Rule set (**Good Mainly for Blackjack**) ★★★★★

OverAll: ★★★★★

[Click here to download Casino Tropez](#)

"Start earning a full income **Working at home from your computer.**"

[The Ultimate Wealth Package \(Click Here\)](#)

Yukon-Gold Casino:

A Great Casino with Good Rule Sets (Mainly for table games) and has a sweet money back guarantee (I will explain later how to exploit it).

SignUp bonuses (**100% Money back Guarantee**) ★★★★★

Payout rate (**98.42% +**) ★★★★★

Rule set (**Good for table games**) ★★★★★

OverAll: ★★★★★

[Click here to download the Yukon-Gold Casino](#)

Aztec Riches Casino:

A Great Casino with Good Rule Sets (Mainly for table games) and has a sweet money back guarantee (I will explain later how to exploit it).

SignUp bonuses (**850\$ Bonus!!!**) ★★★★★

Payout rate (**99.56% +**) ★★★★★

Rule set (**Same games as Yukon**) ★★★★★

OverAll: ★★★★★

Comment: The payout rates are mainly because this Casino attracts high rollers who are generally better players than the amateurs at other Casinos. 888 still gives the games with the best odds.

"Why pay over \$90.00 a month for Cable or Satellite TV services?

Satellite TV for PC! **Over 300 Stations for a One-Time Fee!"**

[Satellite TV for PC \(Click Here\)](#)

I would personally stay away from these Online Casinos (because of my experience or Rumors):

100 Black Rhino	Eiffel Casino
2 Bet On	Gem Casino
4 Sports Betting	GoldenComps.com
Action City Gaming	LazarusCasino.com
All Sports Betting	Mayan Casino
Axel Casino	Nile Casino
Big Dollar Casino	Ritz Oasis
Bubbas Casino	Superbet
Casino Britannia	Transnetcasino.com
Casino King tut	VinoCasino.com
Casino Titanic	Win City Casino
CasinoHeat.com	Win4real.com
Club Rio Casino	World Charity Casino
Club VIP Casino	World Wide Gamble
Cyber Thrill	World Gaming1 Lucky Gambler

Easy Casino Exploits!

I Would also like to teach you a few exploits of the Casino's Bonuses.

- **Blackjack Strategy** – Blackjack is defiantly the game with the best odds in the Casino! (check the specific payout rates and you can see for yourself...) Playing Blackjack strategy you will lose (on average) 0.5% of every bet made. On the long run, This is a sure way of cashing out with your own money plus most of the Bonus. [This FREE eBook explains how to do it.](#)

You can also take [This Free Online Course](#) that explains the blackjack strategy without doing a whole lot of reading.

- **Extreme Martingale Roulette** – This is a system that I created (based on the martingale system), that will gradually earn you money always. The problem is that it is a bit risky, But [Captain Cook's Casino](#) will give you an hour of FREE PLAY WITH 500\$. This way you can use this system and if it earns money, keep it, if it loses, no harm done. I Used it three times with three different accounts, with one I made almost 400\$ in one hour, With the second I made 140\$ and with the third I lost the whole 500\$ But who cares?! It was free Money and didn't cost me a dime.

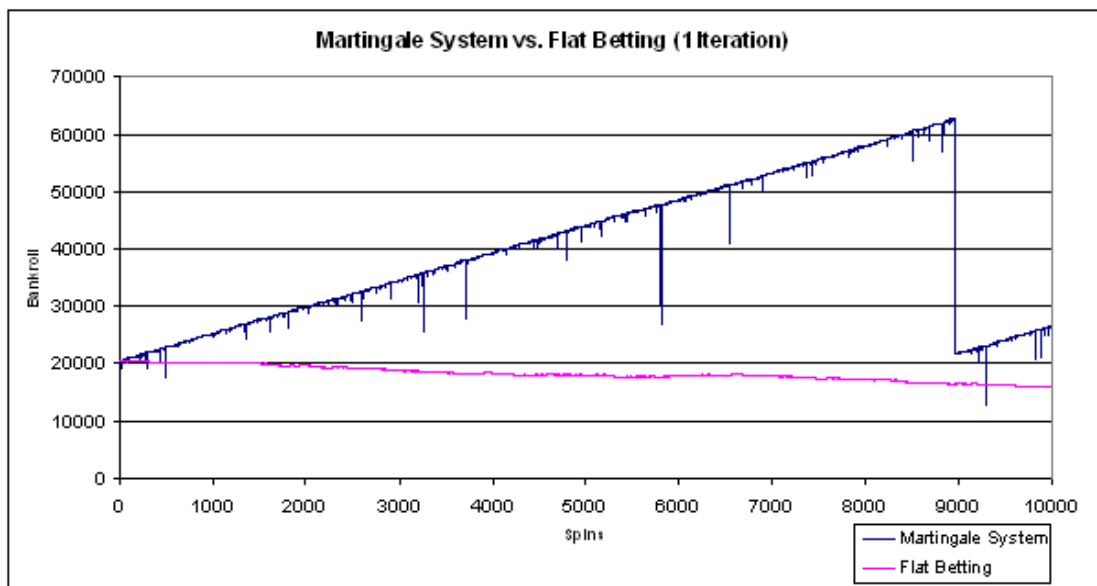

The system is very simple! Bet on any 2 to 1 Payout (if you bet 1\$ you get 2\$+ your 1\$ bet for a win) On the Roulette (column 1,2 or 3, first 12, middle 12 or last 12) with one dollar. If you win, play one dollar again, if you lose, double your bet. In this manner your bets will be: 1\$,2\$,4\$,8\$,16\$,32\$,64\$,128\$,256\$ The probability of getting to the next 512\$ bet is 0.00109245 percent, good odds for any Greek (You will only understand this comment if you've seen '300'.. Great Movie)!

With this system you will always win 150% of what you lost in the previous rounds. After a win go back to a 1\$ bet. Why is

this system only good for free money games? Because with real money there are 2 risks:

- Running out of money when you hit a bad streak.
- Table limits. If you Reach the table limit you can't double your bets any more, and so you can't make the 150% profit the next spin.

This Graph will explain why martingale system is no good on the long run:

This is a computer analysis of the Martingale system Vs. flat Betting at Roulettes. As you can see, the Martingale system (Blue) had a steady income and peaked at 60,000\$!! But See the Big fall? The computer program 'lost' 40,000\$ in 13 unlucky spins and ran out of money to double the wager! Avoiding this would be smart, but is unfortunately impossible to predict!

So only use this system on Bonus Money, [click here to play a free hour \(with Bonus Money\) at Captain Cook's Casino.](#)

You can also try this system out on a demo before you play – Just chose the 'not real money option'. You will see how you gradually increase your earnings.

100% Money Back guarantee – The Yukon Gold Casino Offers this great option. You should read the conditions though. Its only good for 24 hours, up to 50\$, you have to make a minimum 10 wagers, you can only do it on your first deposit and you have to lose all your money to get the refund. Piece of cake. I tried this a Few times with different accounts. Once with Blackjack: I deposited 50\$, played a bit, got to about 80 \$, increased my bet size because I got bored and lost it all. Got the refund, no foul, no harm. With the second account I played French Roulette (No this is where they try to trick you... they also have American Roulette and European, but French has the best Odds because of the surrender option). Made 5\$ bet on number 4 (felt lucky with it) every spin. On the 6th spin it hit number 4 and I cashed out with 200\$!!! I then tried it again with my third account, this time betting on 17, 5\$ per spin, exactly the 10 minimum wagers needed to get your money back. I lost all the bets but again, I got my refund and had a great time :)

[Click Here To Visit The Yukon Gold Casino.](#)

You can also play 'not real money option', to try it out.

P.s.

Some Useful Blackjack Links:

If you're into Blackjack, you might want to check out these tools:

- [The author of this eBook](#) claims to have the specific methods to beating each online casino, because he programmed their algorithms or something. His methods truly do give an extra edge over the online-house but unfortunately, because of legal terms I can't reveal them and if you want to see them, [buy his eBook for 5\\$](#).
- [This Free eBook](#) Explains How to make money playing Blackjack and exploiting the Casino Bonus.
- [This Odds calculator](#) is used to compare the Casinos between the sets of rules to find out where the best odds are.
- [This tool tells](#) you what action is the smartest, depending on the number of decks, what cards you have, what the dealer has, rule set and so on.
- [An online Blackjack Course](#) that explains some of the methods described here. Great for improving your skills!

That's all... Gamble responsibly and don't gamble with money you can't afford to lose!!!

Now go have fun and Make Some Money :)
